Product Description

Brackets and cantilever arms

Cantilever arm brackets offer flexibility in design, accommodating changes and adjustments to the installed infrastructure.

They can be easily adjusted or repositioned, providing versatility in system modifications or expansions.

These brackets can be used in conjunction with other support systems, such as brackets with slotted holes or adjustable arms, for comprehensive installations.

Product Show:

Hole Size:28*14
Slots are 28*14,50 on center

Packages:

Beam Loading Date

Advantage :

- 1.High quality and Reasonable price
- 2.Convenient in construction and save much time and labor
- 3.Size and length of the product can be manufactured according to customers' requirments
